

Health and Safety Advice and Support

Every business, no matter how large or small, needs access to competent health and safety advice. Do you have access to advice you can trust? Partner with us so we can provide this support and resource.

“

C2C Group have been our competent health and safety advisors for the past three years. As a business owner in what can be a risky industry, it is a comfort to me to know we have easy access to professional advice, from people who really understand what we do. C2C Group have represented us in client discussions and have given our customers confidence in our ability to deliver safe projects and keep our people healthy.

Marin Gazulli, MGB Contractors

Our Service

Every business, no matter how large or small, needs access to competent health and safety advice, as stated by the Health and Safety at Work Act. We recognise this resource is not always available in SMEs or growing businesses where current resources may be stretched.

Partner with us so we can provide this support and resource. We are NEBOSH-qualified and chartered members of the Institution of Occupational Safety and Health (IOSH).

We at C2C Group have the required knowledge and training, along with 20 years of competent experience, to guide you through the health and safety legal system.

We will work collaboratively with you to ensure you achieve high standards of health and safety. Our aim is to become your most trusted expert, on hand to answer your questions and give you advice.

We do this by:

- Carrying out an initial audit of your organisation's health and safety policy, management systems, and procedures
- Providing access to competent health and safety advice at any time via email or phone
- Issuing quarterly newsletters with details of any relevant health and safety news and legislation updates
- Sharing knowledge and safety alerts relevant to your business
- Being on hand to support and deliver if we identify the need for additional support

By partnering with C2C Group, you will be able to name us as your competent health and safety advisor for your organisation's accreditations (such as CHAS and Constructionline) and satisfy the requirements of the Health and Safety at Work Act.

We also provide the same service for environmental, sustainability and quality advice.

Our expert health and safety professionals are ready to connect with you and understand your needs.

Gain clarity and build confidence in your team.
